

TRACE SYSTEMS

JUST THE TICKET FOR MITCHAM BELLE

Mitcham Belle's tacho. bay is set up and running for third-party tachograph and speed limiter check, service and repair - all managed and controlled in their Trace system.

Mitcham Belle has selected Trace Systems for garage, workshop, stores and fleet management. This PSV business operates a bus and coach fleet of 135 vehicles. It also provides tachograph and speed limiter maintenance, servicing and repair for another 300 CVs & PSVs of third party customers including London Transport.

Peter Burstow, head of fleet and garage services said, "With the growth in our third party garage business and in our own fleet size and activity, we need to have far better control.

I have used Trace elsewhere and I know that it is easy to use, complete and has excellent training and support. That is why we have selected it for such an important task." In addition to its new systems, Mitcham Belle also now has 7000 sq ft of newly refurbished garage premises at Croydon for servicing its 135-strong fleet and for providing its third-party maintenance services.
